

MXC20 Modules Quick Connect

QuickConnect modular connection systems are designed for automated equipment that requires frequent connection and disconnection of utilities.

Features and Benefits

- The family of QuickConnect System is the most flexible connection system on the market.
- 4 open module locations are provided for custom configuration of the MXC20 for your application.

Not exactly what your application requires? Applied Robotics can design a solution that meets your particular application needs.

Applications

- Test Benches
- Robotic Tool Changing
- Power clamps and work holding fixtures
- Rotary Turntables
- Docking Systems

Note: Specifications provided are maximum recommended limits under static conditions. For correct product sizing, consideration must be given to all dynamic forces, including manipulator inertia, tooling configuration and external process forces.
